

Achieving a Seamless and Hygienic Flooring Solution at FMCG Factory, Haridwar

About FMCG Factory (Haridwar)

A leading name in the FMCG and food industry, renowned for their commitment to quality and hygiene. Their products reach millions, ensuring safety and freshness with every package.

Challenges

Seamless Flooring Requirement

Essential to inhibit the growth of microorganisms and ensure product safety.

Existing Damaged Epoxy Flooring

Previous flooring was unsatisfactory, compromising hygiene standards.

Minimized Downtime

Plant operations could not be halted; required a swift and efficient solution.

Dust-Free Environment

Necessary to prevent contamination during the maintenance process.

Solution

Preparation

Utilized vacuum grinding to remove loose epoxy and prepare the floor, ensuring a dust-free environment.

Primer Application

Applied RachTR EP101 Primer, a low viscosity and fast curing primer, to create a strong base.

Screed Application

Used RachTR Screed EP91, a heavy-duty and fast curing screed, to level the floor.

Top Coat Application

Applied a sealer coat followed by RachTR EP1010N top coat for a very high gloss finish.

Impact

Enhanced Hygiene

Achieved a seamless floor inhibiting microorganism growth, ensuring product safety.

Improved Durability

Provided a long-lasting and resilient flooring solution, addressing previous damage issues.

Minimal Downtime

Executed the entire project in 36 hours, aligning with the client's schedule.

Customer Satisfaction

Delivered within the time frame and met all customer expectations.
